This is the real thing! Now you too can experience all the thrills of riding on the Space Shuttle. You'll feel weightlessness as you blast off in the Space Shot, and you will know what 4G's of launch force is like, feel what it is like to walk on the moon in the 1/6 gravity trainer chair, and tumble in an out-of control spacecraft in the multi-axis trainer. And that is just the training for shuttle missions that expertly simulate the experience of manning the orbiter. If you go for the three day program, you may find yourself signing on for the full five days because you will have a blast. Two training missions, in the Orbiter, Space Station, and Mission Control, culminate in the realistic six-hour shuttle mission complete with a real NASA Astronaut steak & eggs breakfast. Get on board NOW!
